INDEVA[®]
INTELLIGENT DEVICES FOR HANDLING

Liftronic® Easy-6

A Human Arm Extension

Connection points for the electrical and pneumatic cables

Necessary if you add your own custom gripping device.

USB-PC connectivity

For easier communication with the manipulator via a PC.

Touch panel user interface

User friendly and intuitive interface for the visualization and setting of various operation parameters.

Hassle-free cables installation for your custom gripping tool

Electrical and pneumatic cables pass through the handle support, avoiding becoming tangled or bunched and providing enhanced visibility. (Optional item and only for capacity < 160Kg).

Enhanced safety

If you add your own custom gripping device you can easily implement safety functions by means of our **I-Connect interface module** (optional item).

Easy application of 2 extra push buttons

To operate your own custom gripping device.

Quick interchange of different size touch sensitive handles

By means of a standard screw in the tool head.

“Dead man” safety function

This detects when the operator is holding the handle and disables the arm brakes if present (optional item).

Very compact and light design!

.....And with all these enhancements the INDEVA® Liftronic® Easy remains the most compact intelligent assist device in the market.
