Linear Manipulator

Liftronic® series

Linear manipulator is an
Intelligent Assist Device of the
Liftronic® Series

- Designed for handling offset loads in areas with low ceiling or overhead restrictions
- All the unique Liftronic® Series advantages are present

Advantages of the Liftronic® Series – the state of the art electronic load balancers:

- Auto-weight sense and automatic load weight balancing
- Precise movement of the load
- High precision in load placing
- The load doesn't suffer any impact when positioned
- Touch sensitive handle giving fingertip controlled movement: you can move the load at the exact speed you want, very quick or very slow
- Total safety in the event of sudden loss of load: the controls immediately balance the system, so removing the risk of sudden upward movement of the tooling
- User-friendly
- Easy to maintain
- Remote servicing available
